Education

VIT Bhopal University

Bachelor of Technology, Computer Science and Engineering

CGPA: 8.4/ 10

2023 – 2027

Bhopal, India

Technical Skills

Languages: Java, Python, JavaScript, Dart

Frontend: React.js (Vite), HTML/CSS, Flutter

Backend: FastAPI, REST APIs, JWT Auth

AI / ML: LangChain, Google Gemini, TensorFlow, PyTorch, Scikit-learn, Prompt Engineering

Databases: SQLite, PostgreSQL (Basics), SQL

Tools & Platforms: Git, GitHub, Docker, Postman, Power BI, Twilio, Slack Webhooks

Projects

Monacos | *Indoor Health Intelligence Hub* | GitHub

Mar 2026 – Present

- Developed a full-stack AI-powered healthcare platform for real-time indoor environmental monitoring using React (Vite), FastAPI, SQLite, and ESP32 sensor integration.
- Built an interactive dashboard featuring live sensor monitoring, multi-room management, hazard alerts, historical analytics, and responsive data visualization using Recharts.
- Integrated an AI Health Guardian using LangChain and Google Gemini 2 Flash to perform 7-day trend analysis, environmental forecasting, and personalized room-specific health recommendations.
- Implemented secure JWT authentication, user profile management, REST APIs, and modular backend architecture for scalable multi-user deployment.
- Tech Stack:** React (Vite), TypeScript, TailwindCSS, Shadcn UI, Recharts, FastAPI, SQLite, LangChain, Google Gemini 2 Flash, JWT, Web Bluetooth, ESP32, Git

InsurRenew Pro | *Bilingual AI Insurance Renewal Agent* | LinkedIn

Oct 2025

- Built a bilingual (English/Hindi) AI agent that automates insurance renewals through intelligent multi-turn conversations, objection handling, and personalized policy upselling.
- Designed a modular prompt-engineering workflow enabling dynamic conversation branching across renewals, customer objections, cross-selling, and payment confirmation.
- Integrated Twilio SMS APIs for payment links and Slack Webhooks for real-time human-agent escalation, following a modular Prompt-Actions-Integrations architecture.
- Tech Stack:** Inya.ai, Prompt Engineering, REST APIs, Twilio SMS, Slack Webhooks

Pulse-Nexus | *Multi-Agent Post-Operative Monitoring System*

Dec 2025

- Designed an AI-driven multi-agent healthcare system using Google ADK consisting of Bio-Sentry, Data-Analyst, and Clinical-Core agents for automated patient monitoring and clinical decision support.
- Developed a wearable health-data pipeline that continuously analyzed heart rate, SpO₂, and temperature against clinical rules to generate real-time risk scores and emergency alerts.
- Built a REST API exposing agent workflows, implemented JSON schema validation, automated API testing, and generated interactive API documentation using Postman Agent Mode.
- Tech Stack:** Google ADK (Python), REST APIs, JSON Schema Validation, Postman Agent Mode, Wearable Health Data Processing

Certifications

- Certified Ethical Hacker (CEH)** – EC-Council
- Introduction to Machine Learning** – NPTEL IIT Madras

Dec 2024

Apr 2025
